4. My views on telepathy: It is not that you think some thing and it gets transferred to another person's brain. While it is just a emotion without language that gets transmitted (read teleported) to another person.

Examples: 1. Sometimes you think of someone and his call comes.

2. Sometimes you are feeling for coffee and your partner gives it without being called.

3. Sometimes you want to go to certain place and out of nowhere your kid also asks him to take him out there only!

Emotion has no language and it travels faster than light.
